

Modules and Concurrency

Samer Buna

SOFTWARE ARCHITECT - AGILELABS

@samerbuna | samer.dev

Modules
(exports/require)

Concurrency
(Without THREADS!)

Defining and Using Node Modules

What exactly is a Module?

Module (In Node.js)

A file (or a folder) that contains code

Node's Global Object

The Event Loop

The Event Loop

What Node uses to process asynchronous actions and interface them for you so that you don't have to deal with threads

Errors vs Exceptions

Errors vs Exceptions

Error is “Problem”

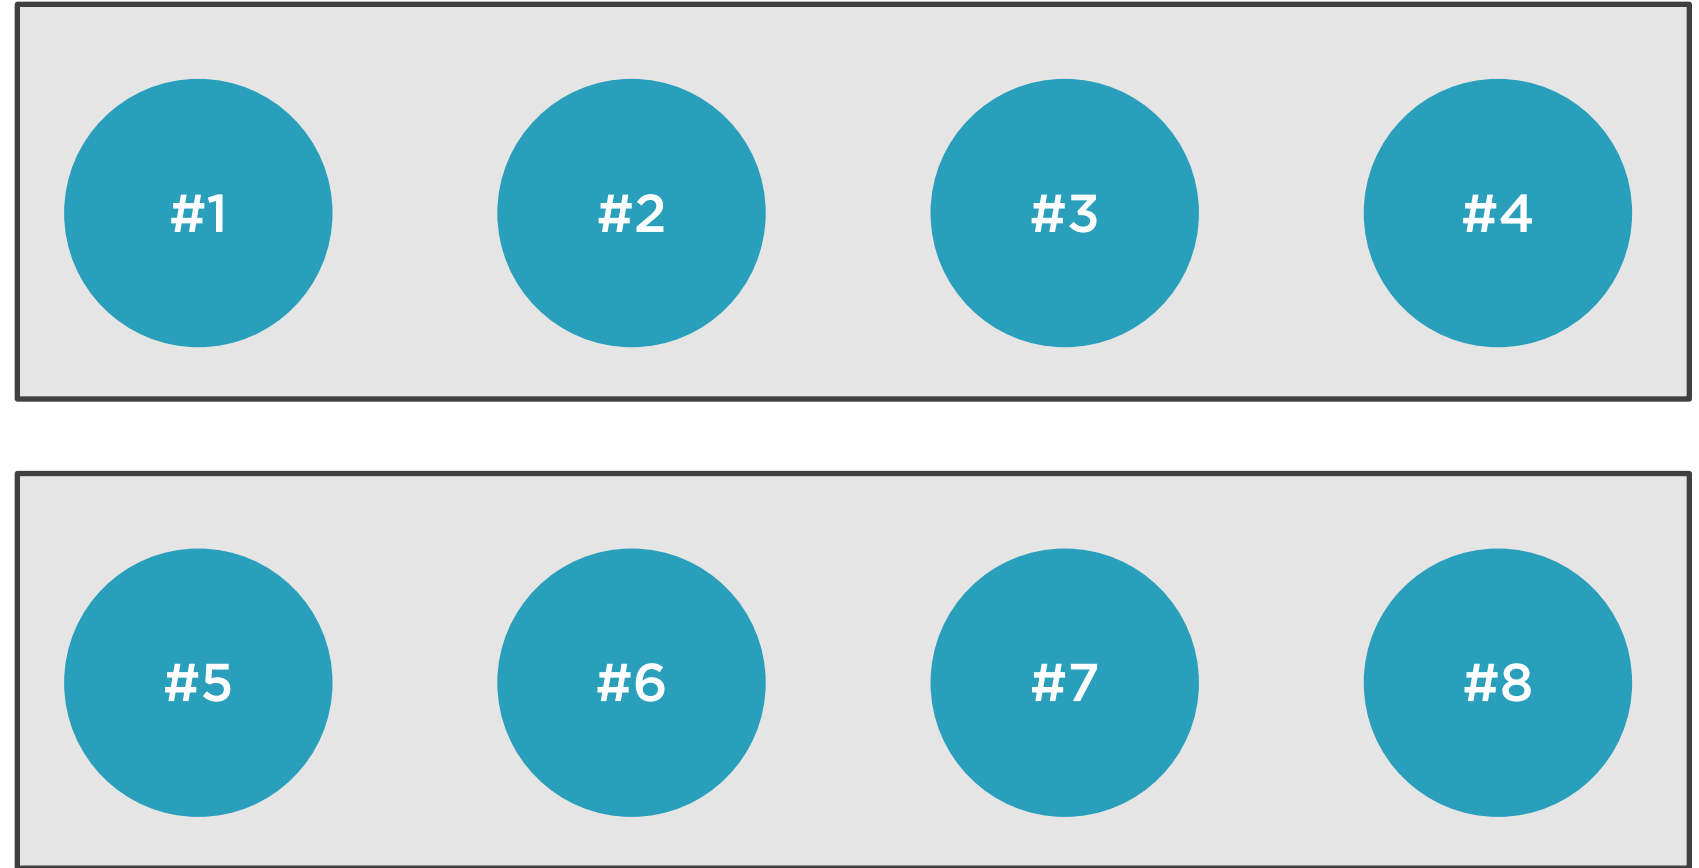

Exception is “Condition”

Node Clusters

[Quick Start](#)[Documentation](#)[Tutorials](#)[Modules](#)[Star](#)

25,894

[Monitor PM2](#)

Advanced, production process manager for Node.js

```
npm install pm2 -g |
```

Features

A Complete feature set for production environment, built with a worldwide community of developers and enterprises

- ✓ Behavior configuration
- ✓ Source map support
- ✓ Container Integration
- ✓ Watch & Reload
- ✓ Log management

- ✓ Cluster Mode

[Check out the related section in the new documentation](#)

- ✓ Startup Scripts
- ✓ Deployment workflow

Node's Asynchronous Patterns

ECMAScript Modules

Event Emitters

Wrap Up

Node Modules
